### WORLD CHAMPIONSHIP 2008 - PERU

FORMULA EXPERIENCE WORLD CHAMPIONSHIP  
FORMULA WINDSURFING YOUTH WORLD CHAMPIONSHIP  
FORMULA WINDSURFING MASTER WORLD CHAMPIONSHIP

#### ABOUT PERU:

Peru is one of the first countries in the world racing Formula Experience. We had our first Formula Experience event early in 2002 and already organized late 2002 the first South American Formula Experience championship. Considerable group of Peruvians have participated in FE World championship events in 2005 (USA) and 2006 (Belgium). Actually, our local FE fleet have about 40 racers, starting from kids of 11 years old. We expect to get to the event with about 60 local racers.

Paracas, the spot selected for the event have the ideal conditions for a Formula event, flat water, no waves and wind all days from 15-25 knots in December. Also, is summer so water temperature is over 20 Celcius degrees always and maximum air temperature can reach 30 Celcius degrees.

Paracas is also a great place for tourism, with lots of natural life, and really nice places to visit. Very close we can find Ballestas Islands (to visit by boat) and Nazca Lines (to visit by air). Also, for the freestyle guns, Paracas is one of the best places, and also, near the event site, are located some very good wavesailing spots. Finally, we strongly

recommend to visit Machu Picchu, one of the new 7 wonders of the world that is really easy to access by airplane from Lima.

The Peruvian Windsurfing Association and Peruvian Windsurfers invite you to visit an exotic country, that will be for sure, a really different experience for all competitors and families. For sure, for New Years, our local team will prepare a great party to share with our guests.

Good wind conditions in Paracas, Peru
